

AVANZA Laboratories Announces Expanded Services to Further Support the Development of Vaccines & Biologics

GAITHERSBURG, MD – February 7, 2012

AVANZA Laboratories, LLC (“AVANZA”), a leading contract research organization (CRO) providing GLP-compliant preclinical drug development services announces the launching of its BioPharmaceutical Services which further support the pharmaceutical industry’s development of biologics and vaccines. Capabilities include PK, immunogenicity, cell based bio-assays and biomarkers with service offerings of assay development, GLP assay validation and sample analysis for both non clinical and clinical specimens.

"It is exciting to be part of a company with a strong emphasis on delivering quality and customer service that continuously looks for ways to augment the support it provides for its clients," said Ira S. DuBey, AVANZA’s Executive Vice President and Chairman of the Advisory Board. "With the growing trend of large molecule drug development submissions, AVANZA is poised to support these companies as I have done in the past. We have assembled a dedicated world class team that clients will be delighted to work with."

“AVANZA’s strong business base built through a solid reputation of delivering on its customers’ expectations is enabling this expansion into the biopharmaceutical services arena,” said Carlos Orantes, AVANZA’s President and CEO. “This allows us to increase our participation in the fast growing biologics and vaccines market and helps us establish deeper and stronger strategic relationships with existing and new customers.”

About AVANZA:

AVANZA is the premier GLP laboratory located in the Maryland biotechnology corridor with expertise in Drug Development Services spanning general toxicology: small/large molecules, vaccines, experimental medicine/efficacy models and biopharmaceutical services supporting the development of biologics and vaccines. Testing capabilities include PK, immunogenicity, cell based bio-assays and biomarkers. Superior quality, meeting and exceeding deliverables, flexibility and responsiveness in a customer centric manner are at the core of AVANZA’s operating principles. Experience includes being both a Prime and Subcontractor to the Government. Our operation has been providing services to local as well as global biotechnology and drug development companies since the early 1990s. Our mission is to ADVANCE Cures Through Drug Development and BioPharmaceutical Services.
